

CourseConnect courses are online courses designed to keep students engaged and successful online. These interactive courses blend with MyLabs for a full online learning environment.

The courses also work well as stand alone online classes. The courses can serve as interactive, media-rich, self-paced training courses suited for professional training.

They can be branded, re-sequenced in their content, or mixed and matched with other course content.

CourseConnect can help colleges meet new student demands for online courses by providing media-rich content that faculty can easily customize on the fly.

## Special Offer for FAPSC Members: 10% off standard per-student price per course\*

*\* Colleges are responsible for obtaining appropriate CIE approval to offer any courses*
